

At Black Grove, our cattle have been bred from a gene pool of historic bloodlines to be moderate at birth, wean 45% of their dam's body weight, breed yearly in our environment and do this on pasture, hay and minerals. We focus on longevity and functionality to reduce the cost of turnover and capital expenditures. Only animals without fertility, feet or udder issues remain in our breeding program. Moderate size cows have less feed requirements, stay in better condition and breed back in our program. *At Black Grove, we focus on breeding cattle that will control your costs and increase your profit. For further information, please visit our website at BlackGrove.com*

Breeding Registered Angus Since 1962

Direct sons of Basin Rainmaker 654X

Basin Rainmaker 654X is a calving-ease and maternal-trait legend who wrote Angus history on two continents. He was the most widely-used AI sire in the history of Argentina, where he sold nearly 100,000 units of semen. Combining the genetics of 654X with these tremendous donors from the Lady and Black Belle families has created rare and unique sires to enhance the maternal traits of any herd in the Americas.
